# ELYSIUM OPERATING SYSTEM

EOS™, (Elysium Operating System), is an Affiliate-IB dashboard with an integrated, secured API connection to your preferred independent 3rd party environment with its settings executed according to operating, regulatory and structural requirements.

## INCLUDING:

- SINGLE - MULTI-TIER 'AUM' TRACKING
- CRM & BUSINESS Affiliate-IB TRACKING DISPLAY

EOS™ provides enhanced Back-end functionality, connectivity gateways for you to track your AUM, from your clientele in real time statements. EOS™ provides you a detailed insight in Entries and Exits, ROI and derived Performance Fee Commissions.

EOS™ provides a powerful security system. Data exchange between the system components is performed over an encrypted connection. Built-in advanced authentication systems ensure complete protection to its accounts. All the system databases are securely encrypted and provided with the backup and recovery options. EOS™ is fully automated for your convenience.
